

Anti-Money Laundering Policy

"Money laundering" is the practice of engaging in a series of financial transactions to conceal the ownership, source, control or destination of illegally gained money. Ultimately, it is the process by which the proceeds of crime are made to appear to have a legitimate origin. The Company is committed to preventing money laundering through its service and complies.

Implemented Procedures

GoGetCrypto aims at implementing strict anti-laundering policy to ensure that its customers will be identified for such suspicion up to a certain standard to minimize the procedural complications for genuine and legitimate customers. In order to fulfil its commitment to provide full assistance to government combating against such illegal financial transactions, GoGetCrypto has developed technologically advanced and reliable electronic system which verifies its client identification and is able to store the detailed record of all previous financial transactions.

GoGetCrypto is obliged to report suspicious transactions. By misusing the service you may face criminal prosecution as we are bound to automatically report such behaviour to the authorities.

One of the main measures to discourage money laundering and related illegal activities, GoGetCrypto doesn't accept cash transaction whether you are intended to deposit or withdraw the fund. The Company reserves the right to suspend or refuse to process a transaction at any stage, where it believes the transaction to be connected in any way to money laundering or criminal activity. In accordance with international law the Company is not obliged to inform the Client that it has reported to the corresponding bodies of the Client's suspicious activity.

Compliance Regime

GoGetCrypto has set up a compliance regime in order to fulfil its formal legal requirement. It comprises the appointment of compliance officer, policy making, and regular review of their implementation.

GoGetCrypto is also committed to regularly update its electronic system for inspection of suspicious transactions and for verification of client identification records, in accordance with any new regulations as they are promulgated, as well as providing training for its employees on enhancements to anti-money laundering procedures that may be required by new regulations.

Deposits and Withdrawals

In the event of money deposits the sender name must match the name of customer present in GoGetCrypto records. No third party transfers are allowed in this case. Additionally, GoGetCrypto will not accept third party checks and/or an endorsed employer's check unless approved by Management.

Similarly in case of money withdrawal recipient name must match the name of account holder who is withdrawing money. If money is withdrawn via wire transfer, it can be done only to the same bank and the same account name from where money was deposited. If money is withdrawn via online payment system, it can be done only to the same account/e-wallet from where it was deposited.

Bitcoin transactions

All the clients that deposit money to their trading accounts via Bitcoin should be previously verified after providing their ID card/ Passport scan and the document confirming their address (utility bill, bank statement). Also, such clients won't be able to withdraw money to any other payment system except Bitcoin. This means that nobody will be able to withdraw bitcoins to other payment systems through us and vice versa. Withdrawals are allowed only via the same method that was used for deposit.
